Motivated and detail-oriented Software Development undergraduate with hands-on experience in mobile application development, web development, and software engineering projects. Skilled in frontend and backend technologies with a strong understanding of responsive design, database integration, and object-oriented programming. Passionate about developing efficient, user-friendly software solutions and eager to contribute to dynamic development and QA engineering teams in Sri Lanka's IT industry.

PROJECT EXPERIENCE

Software Development Group Project (SDGP)

Cross-Platform Service Provider Mobile Application

- Developed a cross-platform mobile application using Flutter and Firebase to connect customers with skilled service providers.
- Implemented real-time booking management and live GPS tracking functionalities for enhanced user experience.
- Integrated Firebase Authentication and Cloud Firestore for secure user management and real-time database operations.
- Collaborated with team members using Git version control to manage project development efficiently.
- Contributed to frontend and backend integration while maintaining responsive and user-friendly UI/UX design.

Technologies: Flutter, Dart, Firebase Authentication, Cloud Firestore, OpenStreetMap, Git, Geolocator

Health Awareness Website

Web Design & Development Project

- Designed and developed a responsive informational website focused on sustainable urban development and SDGs.
- Created structured and accessible web pages compatible with multiple devices and screen sizes.
- Worked collaboratively within a four-member team to improve usability and content presentation.
- Applied responsive web design principles using modern frontend technologies.

Technologies: HTML, CSS, JavaScript, Responsive Web Design

Traffic Data Analysis System

Software Development Coursework Project

- Developed a Python-based traffic data analysis application to process and visualize traffic datasets.
- Implemented CSV file handling, data validation, and histogram-based graphical visualization features.
- Generated analytical insights including vehicle statistics, speeding detection, EV analysis, and rainfall calculations.
- Applied Object-Oriented Programming concepts to build a scalable and maintainable system architecture.
- Designed an interactive user interface using Tkinter for improved usability.

Technologies: Python, Tkinter, CSV Processing, OOP, Data Visualization

EDUCATION

Undergraduate Studies in Computing — **2024 - Present**
University of Westminster, UK Affiliated with Informatics Institute of Technology

G.C.E Advanced Level Examination (Mathematics / Physical Science Stream) — **(2022/2023)**

G.C.E Ordinary Level Examination - Passed — **2019**

CERTIFICATIONS & COURSES

Diploma in English — **2023**
ESOFT Metro Campus

IIT Foundation Programme — **2023**

SKILLS

Programming Languages
- Python
- Java
- JavaScript
- HTML
- CSS

Frameworks & Technologies
- Flutter
- Firebase
- Tkinter
- Responsive Web Design

Databases & Tools
- Cloud Firestore
- Git & GitHub
- CSV Processing
- OpenStreetMap
- Geolocator

Software Development Skills
- Frontend Development
- Backend Integration
- Mobile Application Development
- UI/UX Design Principles
- Object-Oriented Programming (OOP)
- Debugging & Problem Solving
- Software Testing & QA Basics
- Team Collaboration & Version Control

LANGUAGES

- Sinhala – Native
- English – Professional Working Proficiency
